Portofolio

PROFESSIONAL SUMMARY

Exploration Geophysicist and GIS Officer with **one year of experience** in the mining sector, covering **gold, bauxite, and silica exploration**. Holds a **Bachelor of Science in Geophysics from Tanjungpura University**, supported by a vocational background in Geomatics Engineering. Experienced in managing **end-to-end field project activities**, including **geoelectrical surveys (Resistivity/IP), topographic mapping, and environmental monitoring (water and soil quality)**. Proficient in operating survey instruments, including **Resistivity/IP Meters, Total Station, GPS/GNSS, and Water Quality Checker (WQC)**, as well as processing and modeling geophysical data using **Res2DINV and QGIS**. Successfully **mapped more than 750 hectares** of concession areas, **validated 18 exploration drillholes**, and managed **over 100 spatial datasets** to support technical evaluations. Focused on **mining exploration and environmental assessment**, with a commitment to delivering accurate field data across company operations.

COMPETENCIES

- **Geoelectrical Surveying (Resistivitas dan IP)**
- **Topographic and Geospatial Mapping**
- **Geographic Information Systems (GIS)**
- **Geophysical Data Modeling**
- **Spatial Data Analysis**
- **Mining Environmental Monitoring**
- **Technical Report Preparation**
- **Logistics Administration**

PROFESSIONAL EXPERIENCE

LBH KALBAR ***January 2026 – June 2026***
GIS Officer and Environmental Field Officer

- Conducted **topographic surveys and geospatial mapping** across **4 active Mining Business License Areas (WIUPs)** and **2 bauxite processing facilities**, covering **more than 500 hectares** in Air Upas District, Ketapang Regency.
- Monitored **surface water quality across 8 rivers** within bauxite mining concession areas through field data collection and on-site measurements to support environmental assessments.
- Conducted **soil quality investigations** through **4 shallow drilling operations** and the collection of **4 soil core samples**, including documentation of subsurface conditions in areas affected by mining activities.
- Managed and maintained **more than 100 field and geospatial datasets** for spatial analysis, environmental assessments, and weekly technical reporting.

Tools: GPS/GNSS, QGIS, Water Quality Checker (WQC), Microsoft Word, and Microsoft Excel.
Methods: Geospatial and Topographic Mapping, GIS-Based Spatial Analysis, Surface Water Quality Monitoring, Shallow Drilling and Soil Core Sampling, and Spatial Database Management.

CV AMERTA BUMI PRAKASA ***July 2025 – December 2025***
Exploration Geophysicist

- Conducted **geoelectrical surveys and geospatial mapping along 12 survey lines**, covering **more than 200 hectares** in a gold exploration area in Monterado District, Bengkayang Regency.
- Performed **6 additional geoelectrical survey lines** and topographic mapping across approximately **50 hectares** of quartz sand and silica mining areas in Paloh District, Sambas Regency.

- Coordinated **18 exploration drillholes** to validate geoelectrical interpretation results and identify subsurface geological conditions.
- Processed and interpreted **more than 15 geoelectrical datasets using Res2DINV** to generate **2D resistivity cross-section models** for exploration evaluation.
- Integrated field survey results, geophysical interpretations, and drilling data into **technical reports** to support project evaluation and exploration planning.

Tools: Resistivity Meter, IP Meter, Total Station, GPS/GNSS, **Res2DINV**, **QGIS**, Microsoft Word, and Microsoft Excel.
Methods: Geoelectrical Data Acquisition (Resistivity & Induced Polarization), 2D Resistivity Inversion, Topographic and Geospatial Mapping, Drillhole Data Validation and Correlation, and Subsurface Interpretation.

PT NUSANTARA BERDIKARI LOGISTICS ***January 2025 – May 2025***
Administration Intern

- Supported shipment administration by preparing and verifying **more than 150 shipping documents**, including delivery orders and distribution records, to ensure documentation completeness and data accuracy.
- Monitored shipment status and the movement of **approximately 15 fleet vehicles** through fleet management systems and vehicle tracking platforms to ensure timely distribution updates.
- Assisted with **operational recordkeeping and routine fleet maintenance monitoring**, while periodically updating operational data summaries to support smooth day-to-day logistics activities.

Tools: Microsoft Excel, Microsoft Word, and Fleet Management System.
Methods: Logistics Document Verification and Filing, Fleet Tracking, Operational Data Compilation and Validation, and Routine Maintenance Scheduling.

UNIVERSITAS TANJUNGPURA ***May – June 2023 and May – June 2024***
Undergraduate Fieldwork Teaching Assistant – Geophysics

- Coordinated field equipment preparation and data acquisition for **4 electrical resistivity survey activities** and hydrological mapping projects.
- Guided **more than 20 students** in geophysical data processing, **2D inversion using Res2DINV**, and field data quality control.
- Provided technical guidance on **water resource measurements** and assisted with the collection and interpretation of hydrological data at **5 observation points**.
- Mentored students in subsurface data analysis, survey result interpretation, and the preparation of **more than 10 practical fieldwork reports**.

Tools: Resistivity Meter, IP Meter, Res2DINV, Total Station, GPS/GNSS, AWS (Automatic Weather Station), Barometer, WQC (Water Quality Checker), Refractometer, and Current Meter.
Methods: Geoelectrical Data Acquisition (Resistivity & Induced Polarization), 2D Inversion, Field Data Quality Control (QC), Water Resource and Hydrological Measurements, and Subsurface Interpretation.

CERTIFICATIONS & TRAINING

Tanjungpura University Test of English Proficiency – ***UPA Bahasa Universitas Tanjungpura*** ***January – March 2023***

- ***Score: 560 / 677***

EDUCATION

UNIVERSITAS TANJUNGPURA ***Agustus 2018 – Juli 2025***
Bachelor of Science in Geophysics | GPA: 3.28 / 4.00

- **Areas of Academic Focus:** Geophysical Surveys (Electrical Resistivity, Electromagnetic, Refraction and Reflection Seismic, Gravity, and Geomagnetic Methods); Subsurface Characterization (Well Logging, Structural Geology, and Petrology); Geophysical Computing and Data Analysis; Hydrology and Climatology.
- **Thesis:** "Comparative Analysis of Weibull and Rayleigh Distributions for Identifying Dominant Wind Speeds in Ketapang Regency."
